

This year in Kanegasaki:

This year was a great year. I was able to meet many new people and do many interesting things.

At Kanegasaki Junior High School

We have done a lot of interesting things at Kane-chu this year. When the school year just started, I did a short lesson to introduce myself to the students. After that we became able to

communicate. During the big events, like Sports day or the cultural festival, it was great to have the students explain what they were doing. Being able to communicate with the children outside of the classroom is very important. I hope that students will come to see English as a language to communicate in, not just as a class to take in school. That was my goal for this year.

I want to say congratulations to the 3rd years. Good luck in High school!

At Kanegasaki's Kindergartens

This year at the Kindergartens we had a lot of fun together. During our English time, I focused on things that they saw in their everyday life. At this age the children can learn so fast, so it is important to speak and play with them in English. The children are naturally curious so they will ask many different questions. Listening and answering the children's questions is my favorite part of the day. I never know what they will ask me next.

The last days of school at the kindergartens were a little sad, but I

know everyone will grow up well.
